Emmanuel Ufuah

Full-Stack Developer | React, React Native & Node.js

Benin City, Nigeria • ufuahemi@gmail.com • linkedin.com/in/emmanuel-ufuah-b2727b162 • github.com/ufuah

PROFESSIONAL SUMMARY

Full-stack developer with 5+ years of experience delivering mobile apps, web platforms and backend systems for businesses across Nigeria. Strong in React Native and React on the front end, and Node.js, MySQL and Redis on the back end, with hands-on experience in payments, real-time features, background jobs and production deployment. Open to remote contract roles and direct-client engagements.

CORE SKILLS

Mobile	React Native, Expo, Reanimated, React Three Fiber, EAS Build, OTA updates
Frontend	React, Next.js, TypeScript, Zustand, TanStack Query, Tailwind CSS
Backend	Node.js, Express, FastAPI, MySQL, Prisma, Redis, BullMQ, JWT authentication, WebSockets, Paystack
Cloud & DevOps	AWS (cloud hosting), Docker, Coolify, Traefik, Git, GitHub

EXPERIENCE

Freelance Full-Stack Developer
Present

Render0 Studios, Benin City, Nigeria

PalateOasis - Food Delivery Platform
2025 - Present

Multi-city food delivery platform with customer app and companion store-owner app (OasisHub)

- Built the React Native/Expo customer app with animated stories, a coverflow promotions carousel and animated store screens.
- Developed the Node.js/MySQL backend covering wallet, rider dispatch and real-time socket management, with Redis-cached store menus.
- Added a FastAPI recommendation microservice and shipped updates through EAS builds and over-the-air releases.

Stack: React Native, Expo, Reanimated, Node.js, Express, MySQL, Redis, FastAPI

Nockspot - Real Estate App
2026

Mobile real estate marketplace with admin dashboard and payments

- Designed an immersive 3D door onboarding with React Three Fiber, plus a custom floating tab bar and property detail experience.
- Built the backend from scratch with dual JWT authentication, a wallet and Paystack payment architecture, and cross-domain cookie and CORS configuration.
- Delivered a Next.js admin dashboard and deployed the full system on a VPS using Coolify and Traefik.

Stack: React Native, React Three Fiber, Next.js, Zustand, TanStack Query, Node.js, MySQL, Paystack

ACS Roofings - Inventory & Sales System
2026

Stock and sales management system for a roofing materials business

- Implemented sales, returns, exchanges and damage adjustments with stock reservations that prevent overselling.
- Automated period close-outs on a configurable cron schedule that snapshots history and rolls opening stock forward.
- Added low-stock alerts, a calendar view for browsing closed periods, and Excel export.

Stack: React, Zustand, Node.js, Express, MySQL, node-cron

SHIOMA HUB - Fashion Marketplace
2026

Fashion e-commerce marketplace for independent brands

- Created the brand identity and built the Seller Center dashboard for independent sellers.
- Architected a modular TypeScript backend with payments, background job queues, caching and S3-compatible image storage behind a swappable provider layer.

Stack: React, TypeScript, Zustand, Prisma, Redis, BullMQ, Paystack

ADDITIONAL PROJECTS

- **Pluto Partner Portal (2026):** Reseller portal that lets partners offer Pluto's cloud services to their own customers under their own brand, with customer sign-up and billing on the partner's page.
- **Hairlord Beauty (2024):** Designed and built the brand website, hairlordbeauty.com, end to end.
